## Perfluorooctane Sulfonate (PFOS) (2006/122/EC)

---

Directive 2006/122/EC of the European Parliament and of the Council of 12 December 2006 amending for the 30th time Council Directive 76/769/EEC on the approximation of the laws, regulations and administrative provisions of the Member States relating to restrictions on the marketing and use of certain dangerous substances and preparations (perfluorooctane sulfonates)

### Compliance statement

---

PFOS is the abbreviation for perfluorooctane sulfonates; synthetically manufactured chemical substances, which are active on their surface and are heatproof and have water and oil resistant properties.

These chemical substances are graded as being very environmentally persistent, highly bio accumulative and sustainably toxic.

Because of their properties, perfluorooctane sulfonates present a considerable risk potential for humans and the environment.

To the best of our knowledge based on information supplied by our suppliers, products placed on the market by Coda Systems Limited do not contain perfluorooctane sulphonates (PFOS) or lie below the allowed concentration limits defined in the directive.
