DEHP, Phthalates and BPA

DEHP, Bisphenol A (BPA) is used in some hard, clear plastics such as water bottles and baby bottles and in the lining of food cans. Phthalates are used to make soft, flexible plastics such as PVC ("vinyl") products and food packaging.

Compliance statement

To the best of our knowledge based on information supplied by our suppliers', products placed on the market by Coda Systems Limited do not contain more than or equal to 0.1% w/w of DEHP, Phthalates and BPA.
