## California Proposition 65

### Compliance Statement

---

California Proposition 65, known as the Safe Drinking Water and Toxic Enforcement Act of 1986, establishes a list of chemicals which the state of California's risk assessment process has determined to present a risk of cancer, birth defects or other reproductive harm. It is also to inform citizens about exposure to such chemicals.

Coda Systems Limited confirms that to the best of our knowledge based on the information supplied by our suppliers most of our products do not contain any listed substances and therefore do not require a California Proposition 65 warning label.

Although lead is contained as an alloying agent in brass, when products placed on the market by Coda Systems Limited are used as intended, no substances are intentionally released nor do the substances contained themselves pose any threat.

I can confirm that Coda Systems Limited is committed to comply with regulatory compliances and fully understands our obligations regarding the California Proposition 65 and the need to continually monitor the regularly updated list of substances.

Ian Carne  
Chief Operating Officer
